The Federal Reserve is trying to stimulate the economy by printing trillions of dollars. The idea is to get people to borrow money and spend more. They must have already forgotten that is how we got into this mess - borrowing too much and spending too much.

Let's have a lesson in Home Economics. Pay attention guys as this is not just for the girls. Your teacher has instructed how to make a pot of soup. Ten guests are coming. Wait, now 20 guests are coming. Make another pot of soup? Don't have the makings or the time. Instead the cook adds twice as much water. Is the soup the same? Of course not.

Let's say The Federal Reserve has 100 billion dollars circulating in the U.S. It cost a dollar to buy a bowl of soup. Then the Federal Reserve prints and adds another 100 billion dollars to circulate in the U.S. It now takes \$2.00 to buy the same bowl of soup. Your dollar has half its purchasing power.

That's called inflation. That is what the Federal Reserve is doing to your currency right now. Every stimulus package dilutes purchasing power like water in the soup for every person in the country. Friends, this printing of money from thin air is going to be the collapse of our dollar. That's why we should collect as many of these dollars as possible now and convert them to hard assets like gold or silver to protect our wealth.

Mailing of a \$100 program cost the same as mailing a \$5 program. One response to a \$100 program is equal to 20 responses to \$5 programs. So, if you can afford to join a \$100 Program it just makes sense to do so. When those \$100 Bills start coming to your mail box, you will definitely be staying ahead of inflation and will have the funds to invest in that precious metal...gold or silver to protect your wealth and treasures. This translates to Fast, Big Bucks. Feel confident working with THG Funding...we have been serving the home based Entrepreneur building wealth and treasures through Mail Order Programs since Feb. 2005.
